## COMPANY SNAPSHOT

# A decade erecting **steel** across the Emirates.

Panther Steel Constructions Contracting is a specialist steel erection and cladding contractor based in Dubai. We erect what others fabricate — primary frames, purlins, decking, sheeting and cladding — on programme, to the drawing, with our own crews and lifting equipment. We work with main contractors, PEb suppliers and fabricators across all seven Emirates.

## ABOUT PANTHER STEEL

# A specialist erector built on **site experience.**

Panther Steel was established in Dubai in 2016. The company is led by a founder with more than 40 years in steel erection, supported by senior site crews who each bring 20+ years in the same trade. That depth on the tools — not just in the office — is what lets us take on difficult lifts, tight programmes and large spans with confidence.

We are a dedicated erection and cladding partner. Fabricators and PEB suppliers use us to deliver their steel on site, reliably and to specification, so they can promise installation alongside supply. Main contractors use us as a self-sufficient erection subcontractor that brings its own manpower, tools and lifting equipment to site.

## WHAT WE DO

PEB & hot-rolled erection, roof & wall sheeting, sandwich-panel cladding, mezzanine decking, staircases, gutters and trims.

## WHO WE SERVE

Main contractors, developers, PEB suppliers and fabricators — from single-bay sheds to 20,000 m<sup>2</sup> facilities.

## HOW WE WORK

Own crews and lifting equipment, on programme, to the drawing. Self-sufficient mobilisation across all seven Emirates.

COMPLETED FACILITY · FUTURE FOODS, KEZAD — 19,967 M<sup>2</sup>

## SERVICES &amp; ERECTION CAPABILITY

# One erection partner, the full **steel envelope**.

## S1 Steel Erection

PEB and hot-rolled structures — columns, rafters, bracings, purlins and roof framing. Single-storey to G+M+4 and spray-tower height. Erected with our own manlifts and mobile cranes.

## S2 Roof & Wall Cladding

Single-skin and insulated sandwich panels (PIR / Rockwool), valley gutters with downspouts, fascia framing, flashings and trims.

## S3 Mezzanine & Decking

Mezzanine floors, metal decking, staircases and handrails. Internal partitions and platforms within new or existing structures.

## S4 Re-Roofing & Modification

Removal and replacement of existing roof and wall sheeting, openings, bracing modifications and extension works on live facilities.

## RESOURCES – MANPOWER &amp; EQUIPMENT

# Self-sufficient on site.

We mobilise with our own core erection team, tools and a company-owned mobile crane, and scale up with additional crew and lifting equipment to suit each project. Manlifts and larger cranes are hired in to match the lift. Figures below are our typical core strength.

## CORE SITE TEAM

| ROLE                           | NOS. |
|--------------------------------|------|
| Project Manager                | 1    |
| Site Supervisors               | 3    |
| Charge Hands / Foremen         | 4    |
| Steel Erectors & Cladding Crew | 11   |
| Riggers                        | 4    |
| Helpers                        | 4    |

## TOOLS &amp; EQUIPMENT

| ITEM                                | QTY               |
|-------------------------------------|-------------------|
| Mobile Crane — 25T, 4x4 (owned)     | 1                 |
| Mobile Cranes (50–300T)             | Hired as required |
| Telescopic Boom Manlifts (16–26m)   | Hired as required |
| Scaffolding (sets)                  | 2                 |
| Welding Sets                        | 2                 |
| Generators (for hand / power tools) | 2                 |

## Syed Muzamil

PROJECTS MANAGER · BS CIVIL ENGINEERING (AUS)

Registered Engineering Professional with Dubai Municipality and Trakhees (Steel Constructions Contracting, G+1). Oversees execution, sales and tendering across the company's portfolio — from design coordination to handover. Pursuing PMP certification with PMI.

## HSE &amp; QUALITY

# Safety and quality, practised on site.

## HEALTH, SAFETY &amp; ENVIRONMENT

- Safe, healthful workplace is company policy; incidents are preventable.
- Management accountable for prevention; reviews the safety programme regularly.
- Supervisors train crews in safe work practices and enforce site rules.
- All workers wear required PPE — harnesses, helmets, vests, gloves.
- Hazards and near-misses reported and acted on immediately.
- Working-at-height controls: nets, lifelines, certified access equipment.

## QUALITY ASSURANCE &amp; CONTROL

- Work executed to approved drawings, specifications and tolerances.
- Continuous improvement through Municipality, consultant & main-contractor standards.
- Materials handled, stored and installed to protect against damage.
- Erection checked against alignment, plumb and connection requirements.
- Third-party testing arranged where specified.
- Decisions evidence-based; issues recorded and resolved on site.

Full HSE plan, method statements, risk assessments and quality procedures are prepared per project and available on request.
